

## HOSTING INFRASTRUCTURE FOR MODERN APPLICATIONS

Colocation, dedicated servers & cloud hosting in our high efficiency data centre.

### Infrastructure as a Service (IaaS) in London Edge Data Centre

#### About Datanet

Datanet has been providing customers with colocation, hosting, connectivity and backup solutions for 20+ years and its customers benefit from the highest levels of resilience, power, cooling and security provided by its privately owned London edge tier 3+ data centre. Datanet is an ISO 27001 certified business with confidentiality, integrity and availability at the heart of our business solutions.

#### Rack and Colocation Services

Datanet offers scalable and bespoke colocation hosting solutions with generous bandwidth and IP allocation to suit the individual needs of your business, so whether you need a full rack, several units or even just 1U, we can provide a solution to suit you.

#### ISO 27001 certified: Information Security

Information Security, Confidentiality, Integrity & Availability (CIA) are at the heart of our Hosting & Connectivity solutions.

#### Private Cloud Solutions

When the service you want is best delivered from the cloud but public cloud has its limitations then take your customised private cloud from Datanet.

#### Helpful, Local and Responsive

You want service from people who understand your needs, we answer our phones in a few rings and we get to know you and your business.

#### Get Your Offices Connected

From dedicated leased lines and fully meshed MPLS Solutions through to simple DSL connections, Datanet has the right Internet connectivity solution for your business.

#### High Availability Managed Servers

When dedicated, high availability, very busy servers are critical to your business for internal applications or online transactions.

#### Virtualised Servers

Datanet are VMware specialists and operate a high availability and high-performance compute and storage infrastructure that you can consume on a short term basis.

#### Business Continuity Facilities

For larger requirements Datanet can offer the use of office space and meeting rooms as part of your BC plan.

#### Backup as a Service (BaaS)

Datanet has partnered with Veeam® to offer a cost-effective backup solution: Backup your VMware, Hyper-V VM's and all your Physical devices from your premises to our data centre using Veeam® Cloud Connect.

#### Infrastructure as a Service (IaaS)

Datanet can provide and host, on a rental basis, the hardware you need to deliver your services and solutions. We can look after the hardware and operating system while you look after your applications.

#### Software as a Service (SaaS)

With access to the latest software features being consumed and made instantly available from the cloud. Typical examples include email, collaboration tools, CRM and MS Office 365 applications.

#### Proof of Concept (PoC) and Lab Facilities

With generous data centre, operational and office space and flexible short and long term offerings Datanet can provide the ideal secure and technical data centre space for your design and test requirements in a scalable lab environment.
