

Protect Your Remote Workers' Desktop and Office 365 Data

FOR AS LOW AS £0.85 PER USER PER MONTH*

Are your teams being forced to collaborate from home to stay productive and remain safe? Unplanned events like COVID-19 have made "remote work" the new business normal.

This new landscape introduces new data protection risks. Important company data is now stored in laptops and Office 365, yet there is often minimal protection for this data.

The prominence of tele-working has brought new cyber-security risks to data

Datanet's Veeam solution bundle for Office 365 backup and Cloud Connect are designed to keep an immutable copy of your production data at all times. This design achieves protection from the most prevalent cyber-attacks today.

MOST COMMON CYBERATTACKS WE'LL SEE

RANSOMWARE

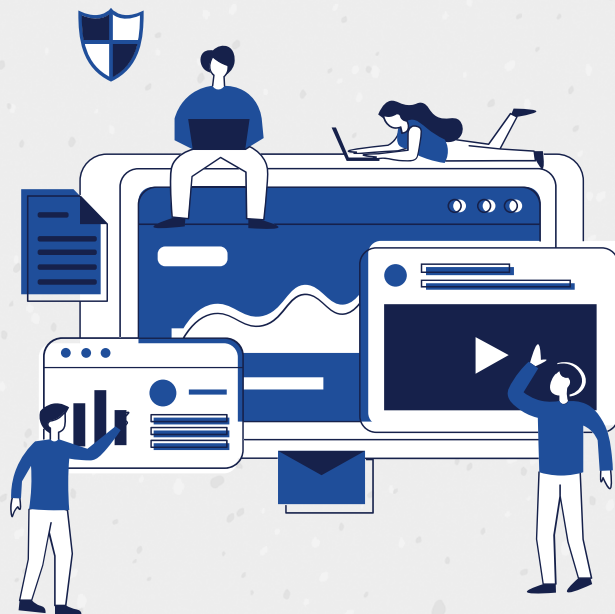

LOSS OF PHYSICAL DEVICE

PHISHING

ACCIDENTAL DELETION

DDOS ATTACKS

ENDPOINT ATTACKS

According to a recent poll of 200 readers by Threatpost, 40% of respondent companies reported increased cyberattacks as they are move to remote working in this time of social distancing.
